DETAILED ACTION

Drawings

The informal drawings are not of sufficient quality to permit examination. Accordingly, replacement drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to this Office action. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

Applicant is given a TWO MONTH time period to submit new drawings in compliance with 37 CFR 1.81. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a). Failure to timely submit replacement drawing sheets will result in ABANDONMENT of the application.

Several color/black and white photographs are blurred and not legible.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mogil (US Patent No. 2001/0039807) in view of Davis (US Patent No.

Art Unit: 3744

2003/0012946). Mogil discloses a divided insulated container comprising: a partition member for separating a first and second chamber, a thermally insulating layer to prevent heat transfer consisting of a plasticized metallic foil sheathing (92) and further comprising a vent as stated in claim 14. Mogil fails mentioned a closed cell urethane type insulation. But Davis teaches a closed cell urethane insulation made from Armaflex. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the disclosed invention of Mogil with a closed cell urethane insulation made from Armaflex as taught by Davis for yielding a more durable insulating material for controlling heat transfer.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mogil in view of Davis as applied to claims 12,14-17 above, and further in view of Ogura (US Patent No. 6,698,210 B2). Ogura further teaches a fan for cooling an enclosure of a cooler. It would have therefore been obvious to further modified Mogil and Davis with a fan for improving air circulation and cooling requirements within the cooler.

Allowable Subject Matter

Claims 1-8, 10,11 and 19-30 are allowed over the prior art prior of record.

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3744

Response to Arguments

Applicant's arguments with respect to claims 1-30 have been considered but are moot in view of the new ground(s) of rejection.
